Identifying Target Group
Research

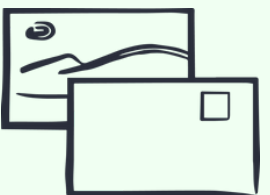

Interpretation of the Design Brief

Framing of Interdependence

How an independent process such as immigration can be made an interdependent one, where people moving away from home stay connected and at the same time adapt to the new social environment?

Target User Group

Immigrants navigating and adjusting to a new, foreign environment.

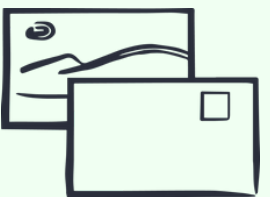

Objective

Not integrating people into a culture keeps them at a distance from taking part in the design of that culture, and our project aims to bridge that gap.

Research Methods

Interviews

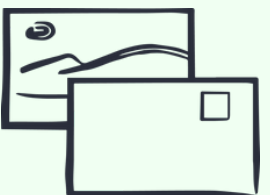

To identify the issues faced by people who move abroad for work.

Task Analysis

To identify the points in the moving process where the difficulties arose.

Market Research

To identify the tools that help immigrants adjust to the new environment.

Interviews

DM2601 Interview Questions

- 1) Where are you from originally and where do you live currently?
- 2) Why did you choose to move? What was the appeal of moving abroad (to this country, specifically)?
- 3) How long have you lived there and how long do you intend to stay?
- 4) How was your preparation for your moving? How easy did you find information? What procedure did you follow?
- 5) Was there a sector you faced the most difficulties in dealing with(e.g., transportation, socialising, housing, work, cultural differences, weather, medical service)?
- 6) What tools did you discover that were readily available to help with your integration?

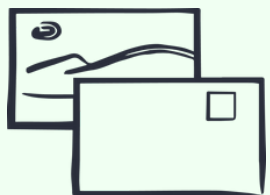

Technology

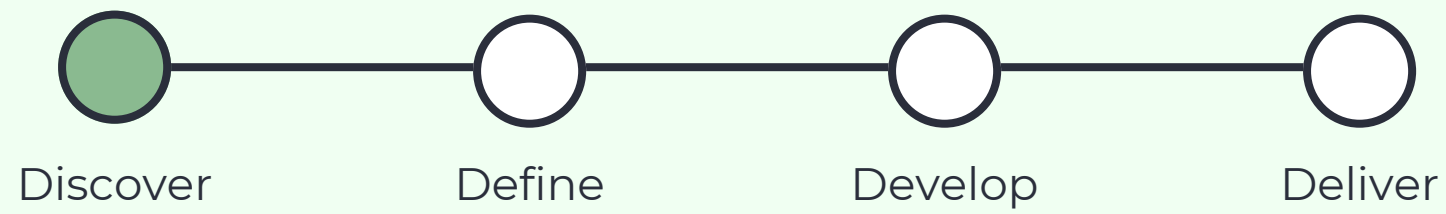

- a) What apps did you use? Did they help?
- b) What websites did you use? Did they help?

Physical

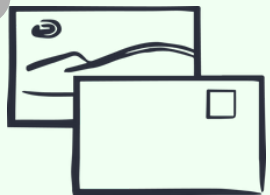

- c) At which institutes did you seek help to make the moving process easier? Was it a pleasing experience?
- 7) What were some obstacles that you have encountered? In what aspects (eg. cultural/societal)?
How did you adapt to these differences?
- 8) In what ways/situations has the new environment been intimidating? If not, why? What did you do to make it easier?
- 9) Do you have any difficulties in your everyday life that would not exist in your home country?
- 10) How do you think you've adjusted to the new country since moving?
- 11) If you were to do it all again from the start, what would you do/how would you prepare differently?

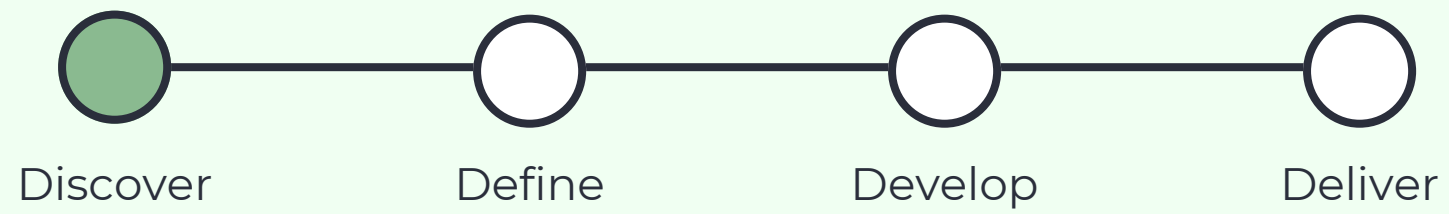

Interviewing people who have moved recently and some time back, helped in identifying issues that would eventually get resolved within a couple of months and **long-term issues** that people are still facing.

Problem Statement Articulation

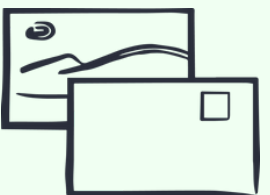

Task Analysis

Gathered Data Analysis

We highlighted tasks that have caused issues for immigrants in their step-by-step process of moving abroad.

Market Research

Nearify

- Suggests events that are happening nearby to the user
- User can tailor the app to search for events they are interested in
- The app cuts out the search for unknown events
- Helps users meet with people of similar interests through going to events
- Not a direct interdependent design but does improve experience when moving to a new place
- Sometimes the hardest part is knowing where to look
- User reviews are quite positive in general
- The app feels very social
- App tracks location and suggests event, helpful in a new place
- Easy to book tickets through the app

Waze

- Provides platform for commuters to connect
- Shows where other Waze users are on the map
- Users can share live information about traffic
- Uses GPS to track speed to stay updated on how traffic is flowing
- Users get real time information on journey time
- Provides user with alternative route options
- Users can share updates on road works, accidents and breakdowns
- Users like the constant updates on traffic
- Users can enter start time and Waze predicts how traffic will be
- Some issues include Waze not updating real time info fast enough
- Very localized app but great interdependent design
- Waze can be quite distracting in when driving

Gathered Data Analysis

We categorized features in **existing products** which help people to achieve in remedying these issues.

Meetup

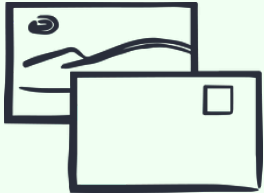

- Build network with people with similar interests
- Exchange ideas with other users and find common things they like
- Users can choose to connect virtually or in person
- Can help each other when having common difficulties
- Useful to share experiences and to draw on other peoples experiences
- Users generally unhappy with this platform
- Meetup has an average rating of 1.5/5
- Users unhappy that platform does not work as advertised

Google Maps/Reviews

- Provides information on places to go see/eat/etc.
- Main focus is navigation
- Users can get reviews on places they want to visit
- Allows user to save locations they 'want to go'
- Uses real time information for help user get from A to B most efficiently
- Also provides information such as opening hours, website info, etc.
- User would have to find these places elsewhere
- Instagram, blogs, reddit etc.
- Provides easy information to help user understand local public transport
- Google maps does not provide recommendations
- When searching for something it does give suggestions of all of that particular search in your area

Goin'

- Platform to help students connect before the begin studies
- Can filter through program, nationality, campus etc. to help find new people
- Provides tips of things to do before moving to Sweden
- Can join groups with people of similar interests
- Students can share location recommendations through the app

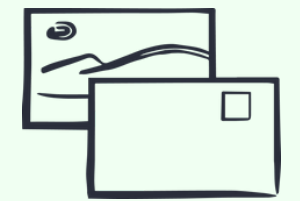

Interview Data Analysis

Gathered Data Analysis

We highlighted **interview** quotes to gather insights about the target users.

Personas

Analyzed Insights Synthesis

Jacques LeBlanc (36)

Teacher in International Elementary School in Sweden

"Mon dieu, I love this country!"

3 yrs

Languages:
English, French, Swedish

Backgrounds:
Originally from Montréal, very well-travelled and worldly, both on his own and through the teachers' faculty.

Now lives on Södermalm with his partner Maja and his two dogs, and is looking at buying a countryhouse. He has to make important decisions now if he wants to commit and start a family here, or go back to Canada. But there is not much there for him, other than family.

Reason for Moving:
Was travelling the world working as an English language teacher and on his way ended up in Stockholm.

Found nature and culture of Sweden very appealing, and instantly fell in love with the country.

Job:
He works as an English and French teacher in an International Elementary school. Now that he has decided to settle, he wants to move up the ranks and become Vice Principal.

Loves working with children and has enjoyed working in international schools all around the world, embracing and encountering so many different cultures.

Personality:
An extrovert who loves teaching and making friends with new people.

Loves reading and staying in bookstores or cafes in Stockholm. Often participates in cultural events such as museums, concerts, parties, etc.

Has totally embraced the Swedish lifestyle and forgotten his Canadian roots along the way. Would appear as Swedish to his own family.

He spends a lot of his free time out in nature, hiking, going berry- or mushroom hunting.

Loves to ski during the winter so moving to the Swedish countryside is the perfect place for him to settle down and buy a house.

Motivations

- Settle down and start a family
- Become vice principal in the elementary school where he works
- To buy a house in the Swedish countryside
- To become a Swedish citizen

Biggest Challenges

- Has forgotten about his hometown and has lost connection with some of his closest friends and some of his family
- Sometimes he misses his family who are on the other side of the world
- Feels like he has fallen out of touch with his Canadian heritage.

Pain Points

- No convenient way to keep touch with his close people in Canada.
- Time differences creating a major barrier from contacting his friends
- He receives complains from his Canadian family, that makes him think about losing touch with them.

Wants / Needs

- To find a way to reconnect with his Canadian roots and heritage
- Needs to be able to rekindle the flame with some of his old friends
- To be able to live like a Swede without fully losing his Canadian life.
- Wants to meet new friends in new environments

Ananya Sharma (25)

Waitress

"Life is an adventure, to explore new places and meet international people!"

½ yr

Languages:
English and Hindi

Backgrounds:
Grew up in the city of Jaipur but always knew she wanted to see the world.

Now lives in Sundbyberg, but is not content and wants to move into the vibrant neighborhood of Södermalm. Finding a house was a difficult process. She turned to the Indian community and managed to find a shared flat with an Indian woman.

Reason for Moving:
Ananya wanted to see the world and experience new places. Sweden was appealing as it is a very environmentally progressive country.

Did not do a lot of research beforehand, but always felt that Sweden would be the place for her.

Job:
She came to Sweden with the prospect of finding a job. Two weeks after her arrival she found a job as a waitress. Her dream is to manage staying in Sweden and work at an environmental NGO.

She is fascinated with the progress Sweden has made environmentally in the last number of years, especially when she compares it to her home country.

She currently works as a waitress in her local coffee shops as she takes time to make her plan for the future. She didn't realise what the long process of getting a personnummer looked like.

Personality:
An extrovert who loves to meet new people

Very conscious about the environment, climate change and sustainability

Wants to meet new people but struggles to socialize with the locals as they can be quite closed. It is important for her as Indian people thrive to belong to a community

Difficult to contact friends and family at home due to time differences, leads to homesickness.

Doesn't want to leave Sweden and leave the opportunity behind her after travelling so far to get there

Tries as much as she can to cook Indian food and carry out Indian customs to make her feel more at home.

She likes to dance in her spare time and also likes to go to the cinema.

Is fearful of the upcoming winter as it's cold and very different from her home climate.

Motivations

- To work at an environmental NGO
- To broaden her social network, outside of Indian connections.
- As an Indian it was very important to belong to a community.
- To travel the world

Biggest Challenges

- She left her home country to fulfill her dream, leaving behind her friend and family. Thus she feels lonely
- **Language Barriers:** metro, announcements, supermarkets, labels are in Swedish only.
- Found the cultural differences between home and Sweden difficult to adjust+

Pain Points

- Getting connections with locals and internationals is hard for her
- Hard to contact her friends and family from India due to time differences
- Did not have a clear picture of some paper works such as application of personnummer
- Is not used to long cold winters

Wants / Needs

- Wants to live here longer because of the work culture here, India has its problems
- Wants to connect with others especially for people from different cultural backgrounds
- To be able to keep in touch with home to give her peace of mind

Magnus Borg (28)

Cyber Security Director, Spotify

"My job is what keeps me in Sweden. It would have been ideal to have some of my Belgian friends living in Stockholm as well."

5 yrs

Languages:
French, English and Norwegian, learning Chinese

Backgrounds:
Parents from Norway. Grew up and has spent all of his life in Bruges, Belgium (and travelled frequently to Trondheim, Norway.) Lives in an apartment alone in Östermalm, Stockholm

Reason for Moving:
He came to Sweden alone and has been living here for 5+ years. The reason for his immigration was work related.

Very well prepared for the admin side of the move, but not the social side

Job:
He had an important offer as an intern at Spotify's headquarters. After his short internship he was offered a permanent job in cyber security.

Since then Magnus has become the company's youngest ever director, which has created jealousy among his co-workers

Magnus does struggle to connect with his co-workers on an emotional level, emphasising his loneliness.

His Norwegian gets him by having to learn Swedish, but can also cause some confusion, and reminds him that he's away from home.

Personality:
An introvert who was very comfortable around his close friends at home in school/university.

Workaholic

Tech-savvy, very intelligent and values this highly.

Struggles to socialize and at times feels quite lonely.

Feels tied to his job and feels that he can't leave Sweden.

Plays video games with his friends online to feel like he's tackling his loneliness. Therefore he spends a lot of his spare time alone in his big apartment.

Likes to listen to heavy metal and classical music, but finds it hard to reach out to others to go and attend concerts with.

Has a lot of hobbies and interests, but does not feel comfortable sharing them with other people.

Was dragged along to a lot of football games by the old gang of friends.

Enjoys beer and snowy weather as it reminds him of his roots. Goes to the gym for exercise.

Loves waffles, but is a terrible cook. Buys a lot of take away food, does not have any emotional connection to food culture

Motivations

- Career success
- Personal growth

Biggest Challenges

- Finding reasons other than work to be happy in Sweden
- Meeting new people and finding others with similar interests
- Becoming comfortable around people that are not his old friends

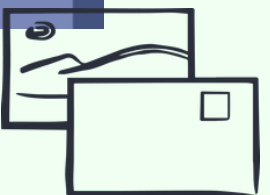

Pain Points

- Introverted personality
- Co-workers are jealous of his rapid rise through the company
- Has niche interests

Wants / Needs

- Ways to connect with his old friends and co-workers
- Finding a Work/Life balance

Based on interview data we created **three personas** to identify different variations of the same problems and be able to apply them to possible solutions.

Scenarios

Analyzed Insights Synthesis

Jacques' Story

Jacques, a well traveled man who has finally settled down, decides to have a rare phone call from his mother. He is calling to tell her how much he loves Sweden and how he is looking to buy a countryhouse there with his partner, Maja.

Jacques' mother is well used to not seeing her son as he has been travelling for years, sending the odd message on WhatsApp to share the new exotic country he is visiting. Still, she is proud of what he has done and achieved. However, on this particular phone call she asks Jacques if he has forgotten about where he has come from and the people who were by his side growing up. She tells him that friends and family are always asking about him and she never has too much to say, only updating them with Jacques' current location.

After he gets off the phone, Jacques really starts to think about what his mother was saying and starts to question himself and if he really has forgotten about his roots. He hasn't talked to any of his mates in years as he felt keeping them updated through Instagram was enough. He starts to think about Canada and its culture and how he doesn't even feel Canadian anymore.

Since the phone call Jacques has been trying to figure out ways to rebuild those connections with his home country and bring the Canadian culture back into his lifestyle. He is unsure how he might reconnect with those friends he left behind, without leaving his newfound love, Sweden. He wants to be able to reconnect with his old mates through more than just social media and rebuild those strong relationships with those that were close to him before he left.

Ananya's Story

Ananya is an adventurous girl who dreams to explore the world outside of her homecountry, India. She recently moved to Stockholm to pursue her dream of working at an environmental NGO. However, until she achieves this, she is working as a waitress in order to afford living in the new city.

Moving to a new country, although exciting has its difficulties, that Ananya has to go through during her first months of settling.

Even though, she found a job easily and finally managed to find a permanent home, she is going through an emotionally difficult week since the most exciting part of socializing turned to be one of her greatest struggles. Ananya was more than willing to meet people and make international friends, however she realized that it can be difficult to socialize with the locals as they can be quite closed. The other day, while working she had a good time with her colleagues, but they are not inclined to socialize out of work. Going back home alone, her fellow Indian roommate suggested her to hang out with the Indian community. Ananya kindly declined, as she feels that connecting with people from different cultural backgrounds is more important for her, as a newcomer.

As she spends the evening alone, she thought about her family and friends at home and felt an instant urge to call them, as it could comfort her. Soon she realized that due to timezone difference, it would be too late to call them as they would have already be asleep. That made her understand how hard it was to contact her loved ones and made her nostalgic of her home and culture. While having dinner alone, she often wonders what she wouldn't do for a meal cooked by her mother.

The next day she decided to enroll in dancing lessons, as she loves dance as a hobby and besides it would be an opportunity to meet some people who share common interests with her. Though, while trying to register she came across language barriers, since she can't communicate with others in Swedish other than basic greetings. Thankfully, English language level is high in Sweden, but Ananya is not 100% comfortable communicating in English yet.

Magnus' Story

Magnus, an introverted tech prodigy from Belgium, has been living in Sweden for five years, after landing a job at one of the country's most prestigious companies. Because of his Norwegian roots, he feels at home in Sweden, even though apart from his job there is nothing keeping him here.

It is Friday. Magnus has gotten home from a long, arduous week of work - and in particular, hasn't been getting along well with his subordinates. Now, he wants to cheer himself up by playing an online computer game with his old gang of friends from Belgium. He gets online when they mention to him that they've planned a weekend getaway and won't be available.

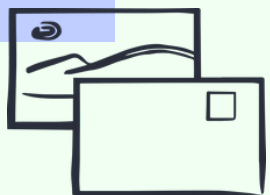

Magnus slowly realizes the empty life he has created for himself. *What do I have here in Sweden, except for my career?* He doesn't go out much, and since he came here right after finishing his studies, he didn't bother bringing much from his boyish life in Belgium.

He feels all alone in his big apartment, and thinks to himself, what can I do to feel more at home here in Sweden? He looks the part of someone Swedish, but sooner or later feels like an outsider, perhaps because of his introverted personality or the fact that he hasn't bothered learning the language.

His nervousness for making new connections he ignored by taking his old friends for granted, and because they live only a short plane-ride away, he didn't feel the distance between them that he does now.

The only thing driving Magnus is to keep pursuing new heights in his career; outside of work, he lives a simple life, he doesn't go out much, he doesn't cook, he doesn't enjoy crowds. Still, the amount of interests Magnus has absorbed over the years would make for great conversation starters; too bad he never wants to start the conversation.

Construct **story** of each persona focusing on obstacles in reaching their goals

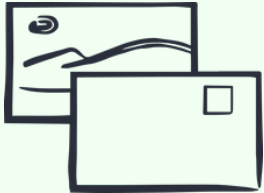

Point of View

Problem Statement Articulation

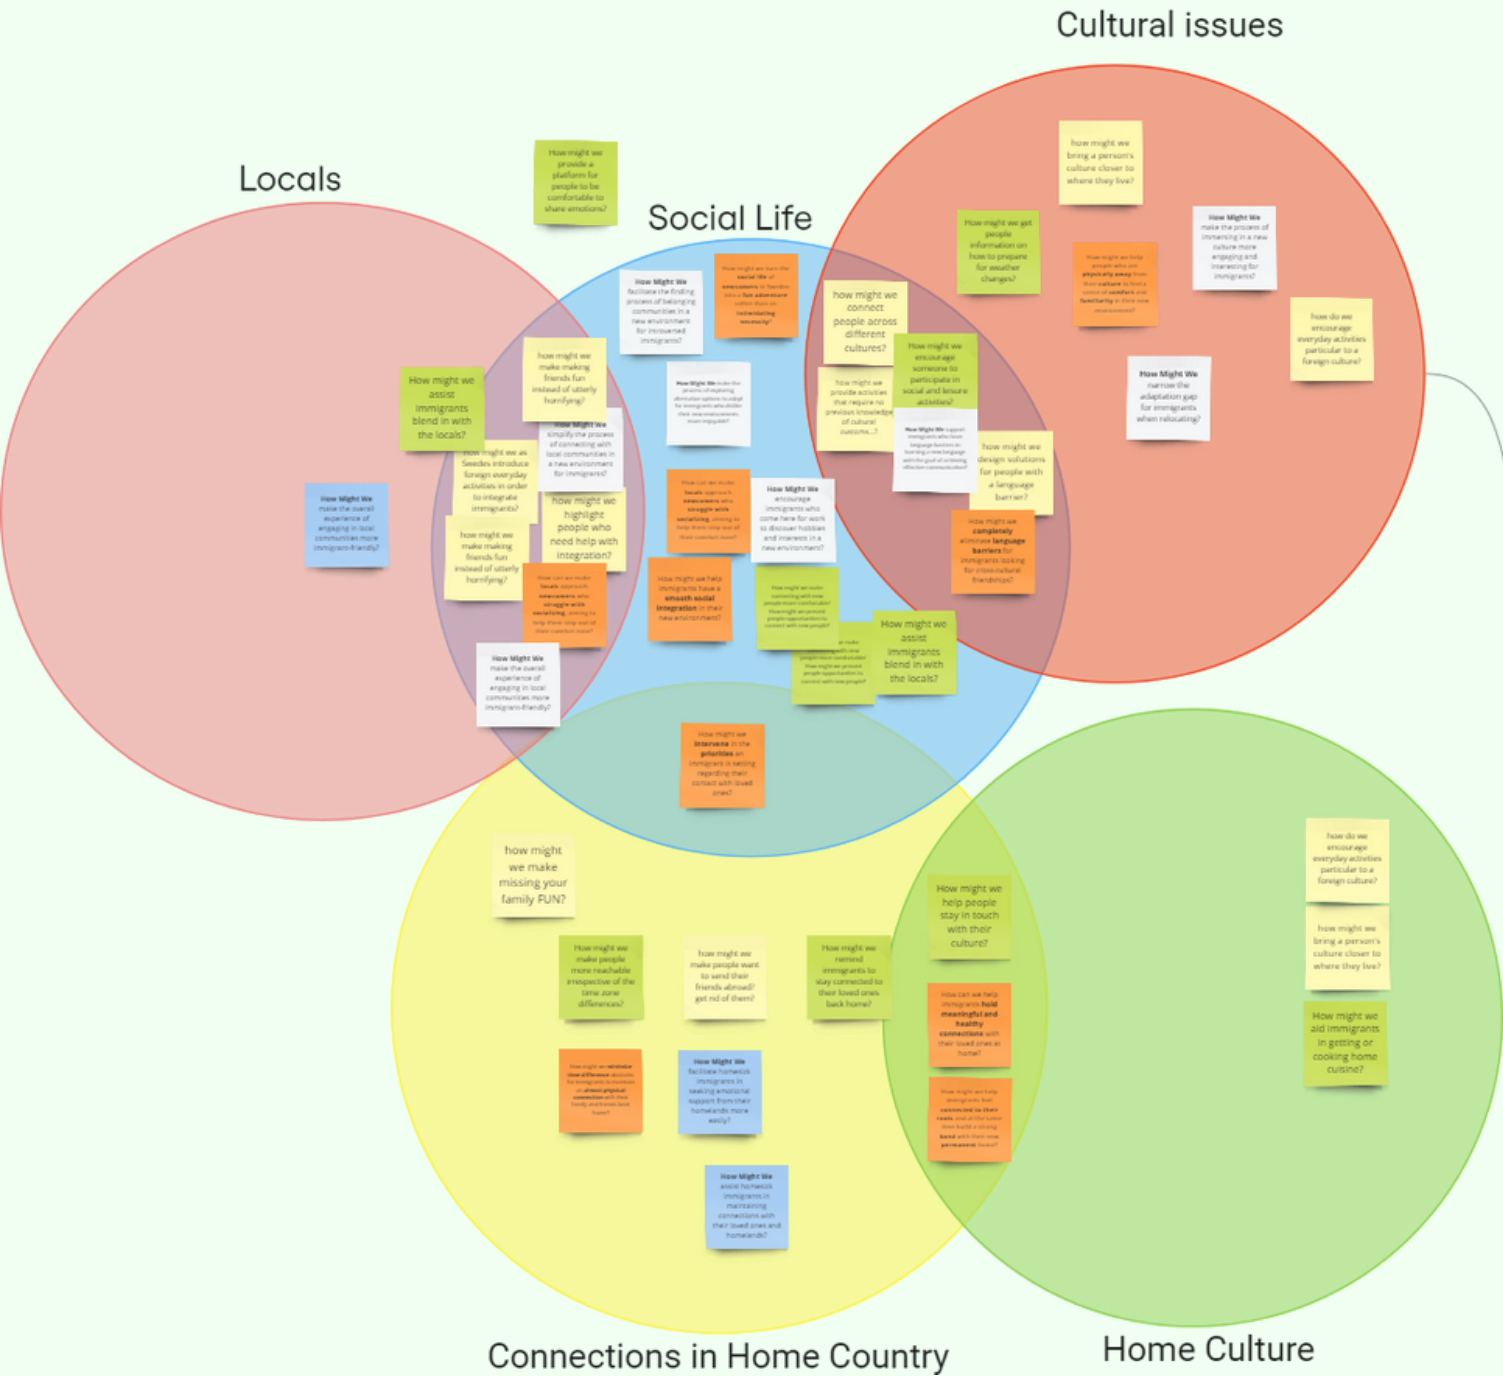

By categorizing all of our POVs, it helped us to identify the main aspects and construct the **problem statement**.

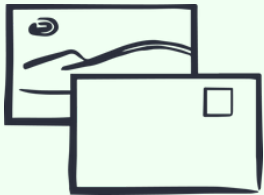

How Might We

Problem Statement Articulation

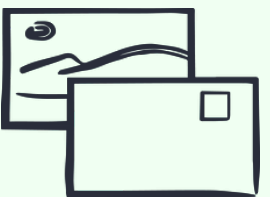

With topics categorized by POV statements, we put our formatted thoughts of HMW statements into each topic and **choose the HMW statements** best aligned with personas' needs

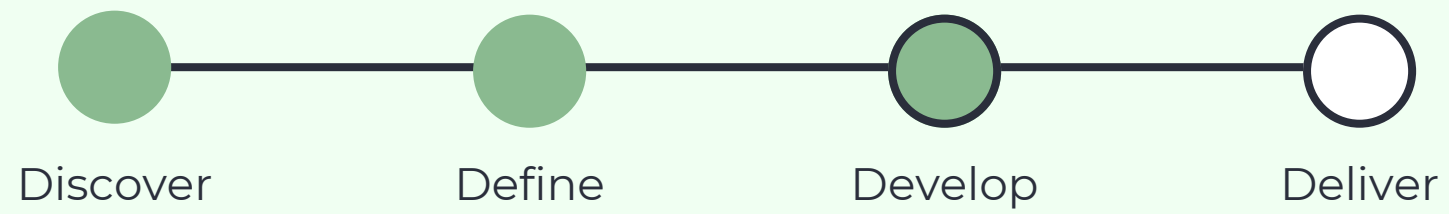

Problem Statement

People who move country often face many challenges and obstacles. Some of the more unnoticed challenges can be related to the emotional connection they have with their home culture. Our primary stakeholders' mental health can become detrimental if these challenge are not addressed.

DELIVER

Evaluation

Real World Testing

Final Concept

Evaluation

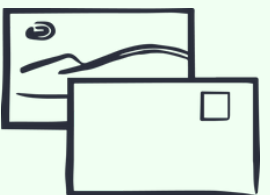

We decided to use two evaluation techniques:

Think Aloud

Cognitive Walkthrough

Our goal for the evaluations would be to discover some flaws in the over flow of the app and to get some outside opinions of what made sense and what didn't.

Evaluation

Task 1 (Complete a mission)

- Log in - (what do you think this page is?)
- Click on “Lisa” - (what does this page show/mean?)
- Complete the mission that Lisa has sent.

Task 2 (Create a mission)

- Now it's your time to create a mission for Lisa.
- Use the 'create your own' feature
- When finished, go back to the home page.

Task 3 (Create a mission using Explore)

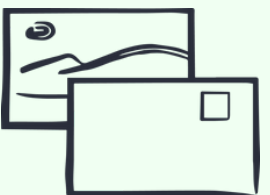

- From the home page, click on Lisa's profile.
- Create a photo mission using the explore feature on the create task page.

Task 4 (Calendar)

- View memories from August 8th.
- Filter memories with Lisa.
- Filter memories to show only the pictures.

Task 5 (Complete another task)

- Complete Diane's music task.

Evaluation

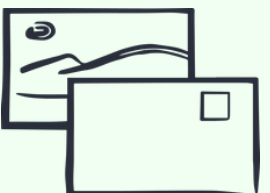

Think Aloud

After we set out our tasks for our evaluation we asked our participants to complete them and to speak how they felt as they went.

We hoped to find out from this if our app was easily learnable for new users.

Some problems that arose during this evaluation method were the evaluator would not follow the task list properly and they also would have periods where they didn't talk and gave no feedback.

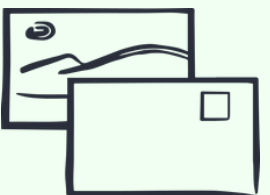

Evaluation

Cognitive Walkthrough

For this evaluation, a member of the group sat down with the evaluators and walked them through the app.

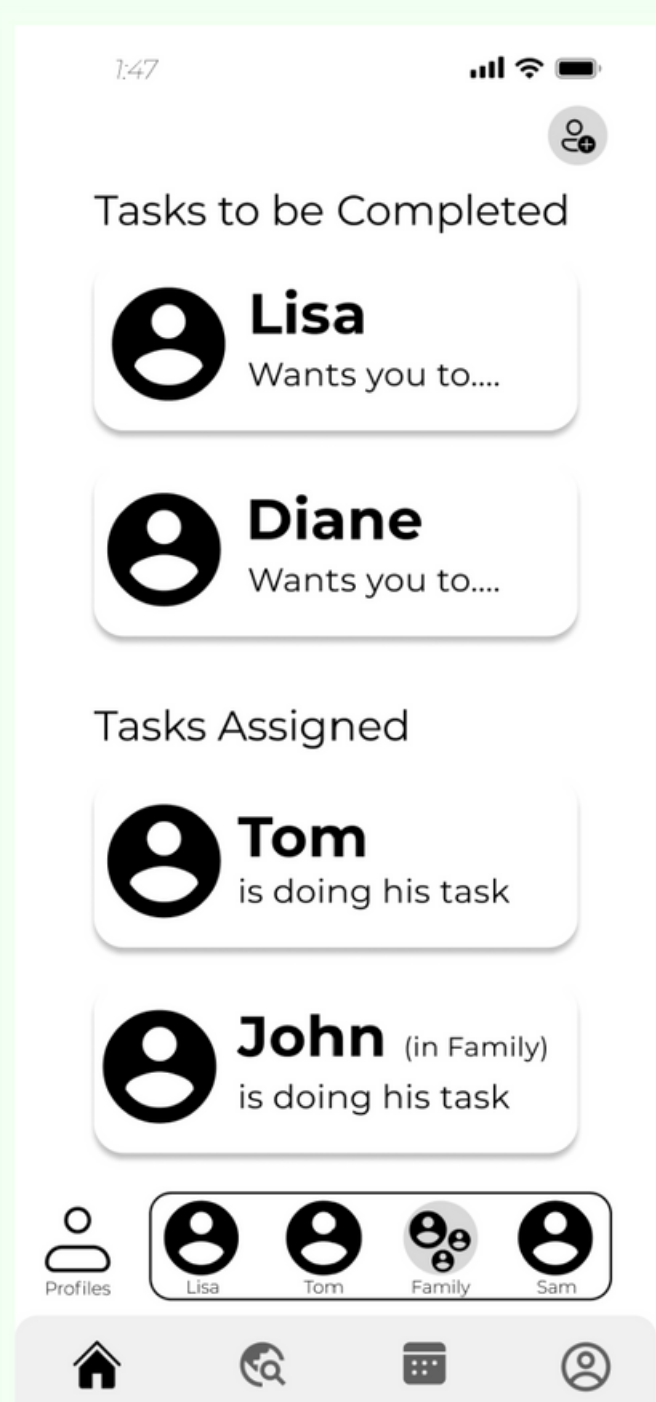

This method turned out to be our most useful evaluation method as it helped us to examine more detailed parts of the interface.

The cognitive walkthrough is also useful for finding where the user fails and also allows the user to make comments and have discussions about how they feel about tasks.

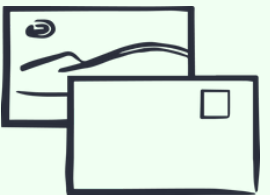

Evaluation Results

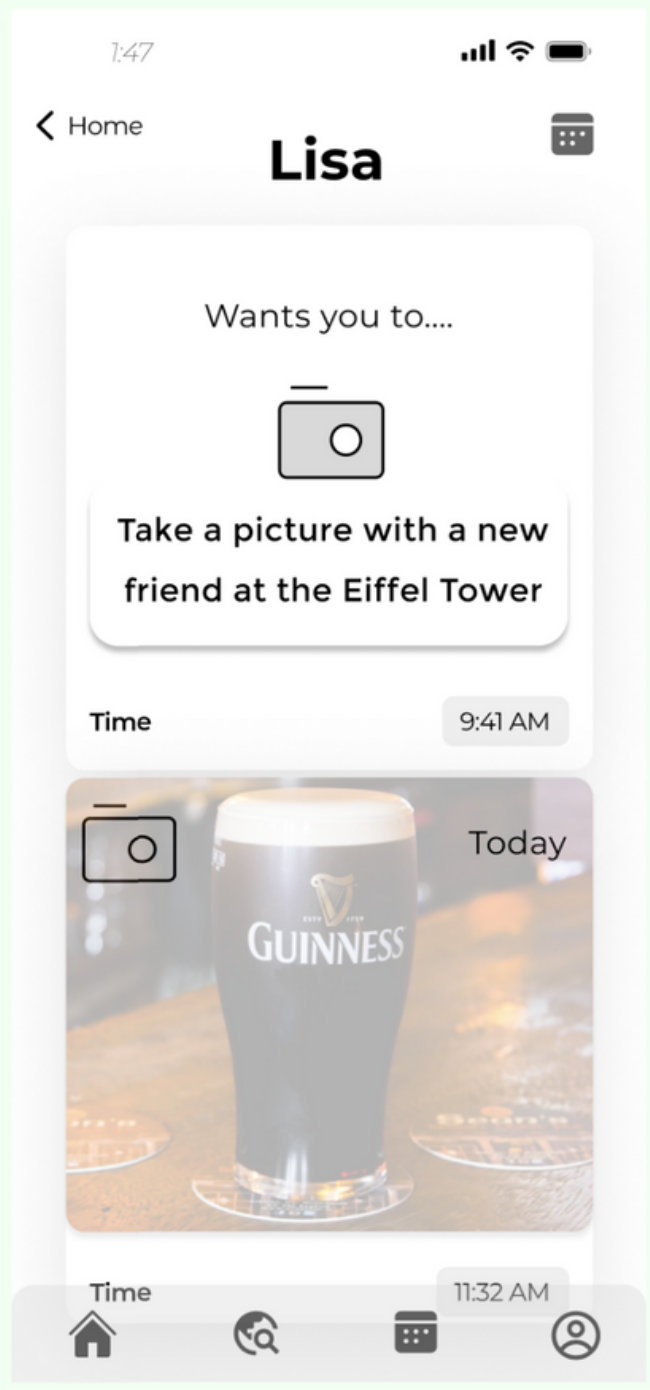

Home screen:

- Too complicated +2
- Home page too messy, focus on different sections
- Tasks Assigned not clear
- Profiles screen placement/size needs to be changed, it looks like another menu
- Tasks to be completed should be highlighted +2

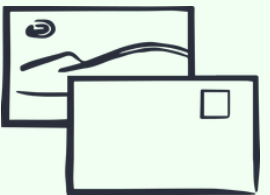

Evaluation Results

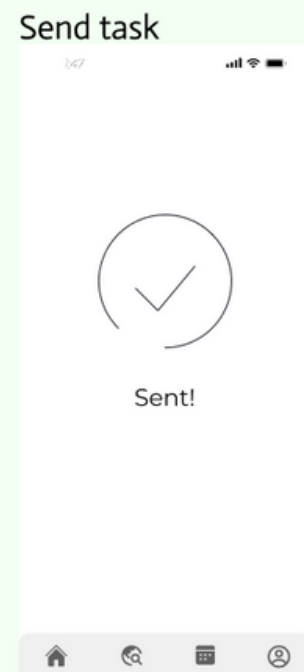

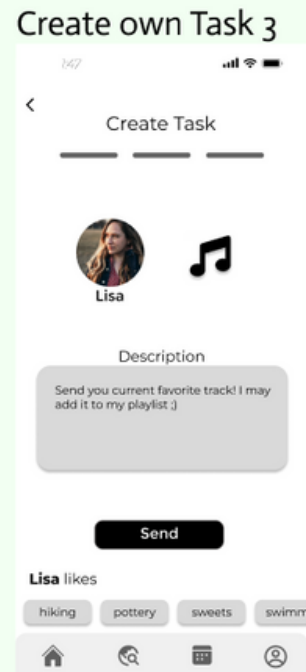

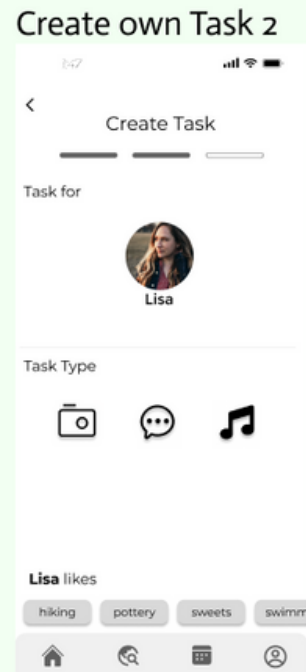

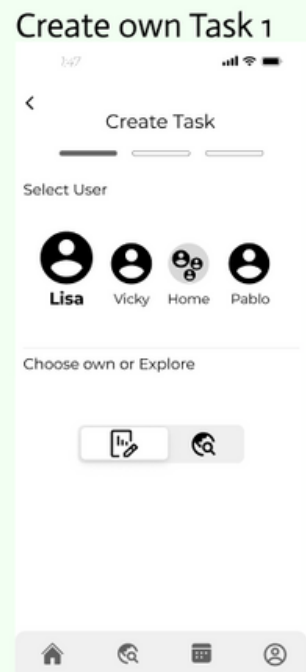

Complete task:

- Not obvious how to start a task
- Drag button too complicated
- Define between public/private
- Should be an option to reject a task/ request alternative task
- Add location as a choice and not necessary

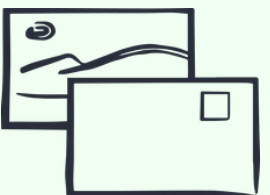

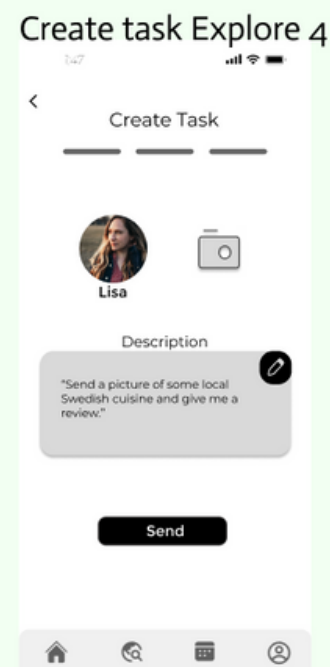

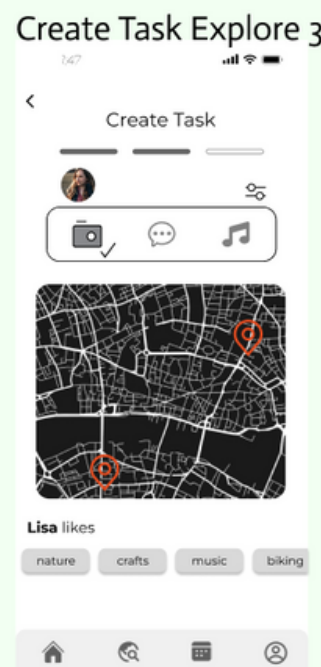

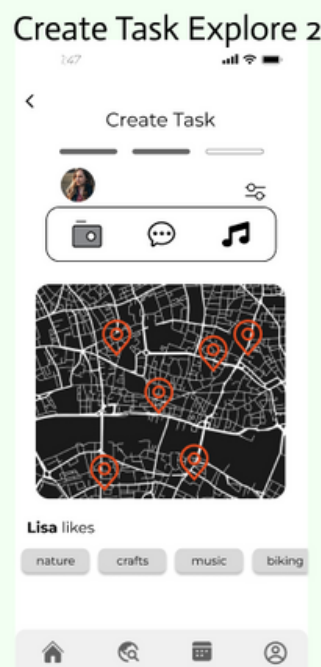

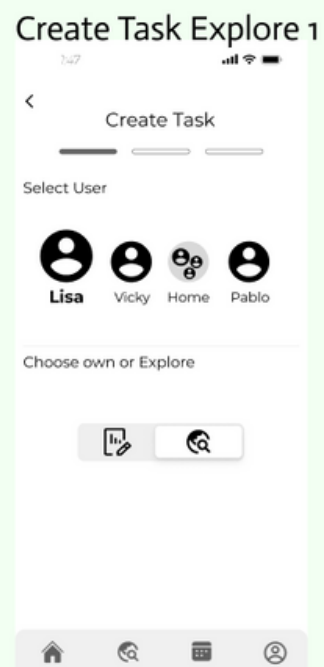

Evaluation Results

Create task:

- Not obvious between explore and create your own
- Change the forward button on music pages
- Add 'or choose from' to music page
- Shouldn't have to reselect the user when going through the chat
- Just display the user profile we want and not all the others
- Task type selection is not clear
- Add a 'next' button

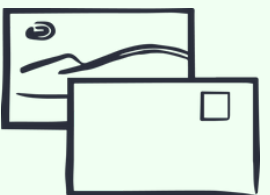

Evaluation Results

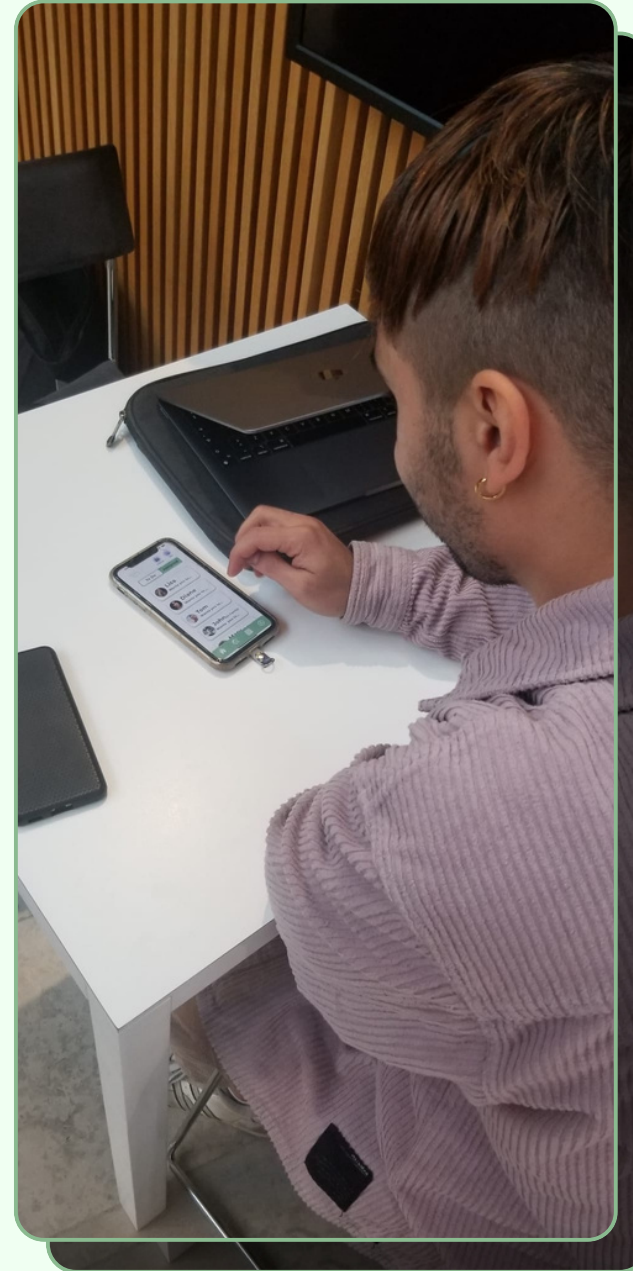

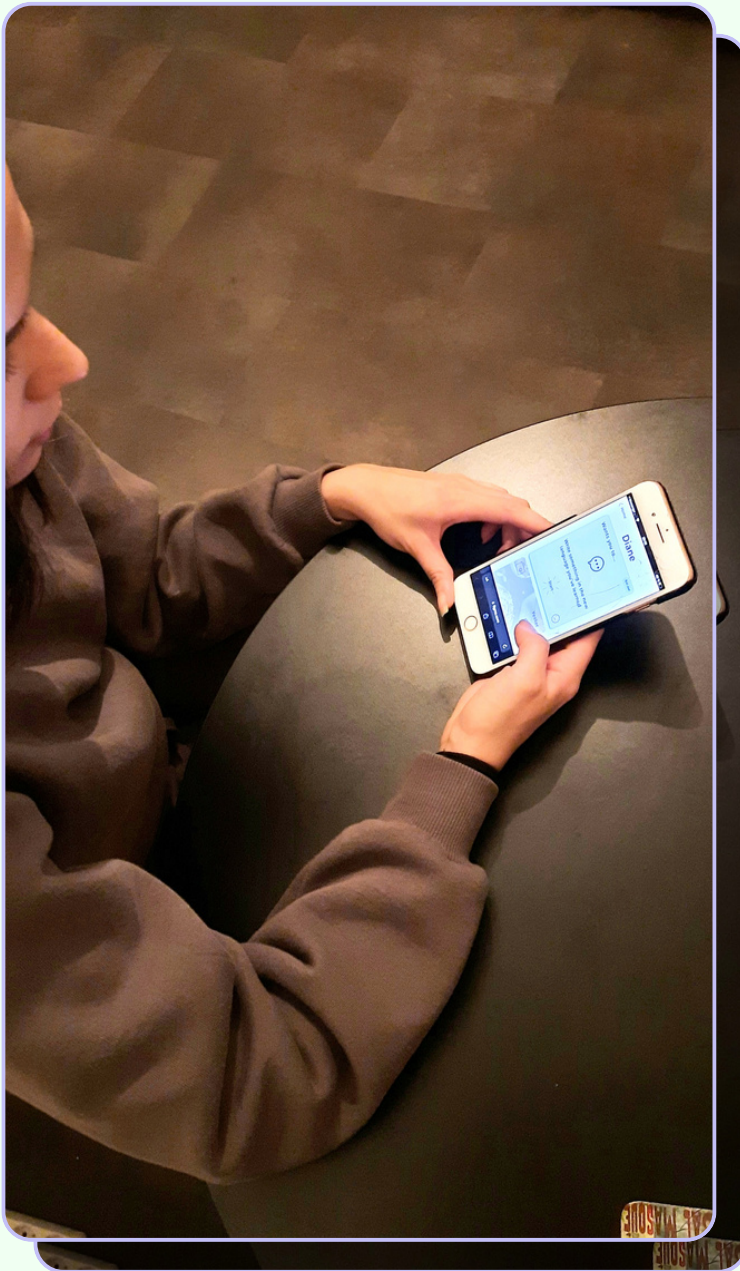

General

- Make return arrows bigger
- Make the filter button more obvious
- Notification to show task viewed
- Deadline not necessary
- More options to do inside
- Liked simple colour (Should have some colours on the screens)
- Profile button size
- Look into a chat function
- Filter needs to be standardised (create & calendar)
- Picture on Calendar page confusing
- Keep the look of the screen consistent

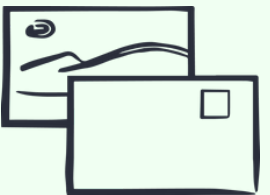

Real World Testing

We conducted several real-world user tests to find out how our app would perform with our target market. We recruited several participants, varying the demographics as much as possible. All of our participants were expats who had moved to Stockholm by themselves.

Our goal was not only to learn about the functionality but also to learn if the app was a concept that these real-world users would use if it were to be developed further.

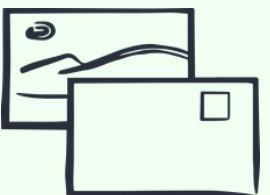

Real World Testing - Quotes

'This is definitely an app I would use with my family. My parents are very tech-savvy so the simplicity of this app would be a nice way to stay more connected with them.'

'I liked the idea of my friends exploring the new city with me. It gave me a better sense of connection with them rather than posting contextless pictures on Instagram.'

'Music helps me a lot, and I reflect a lot through music. So having the opportunity to share favourite songs with my friends, reminds me of the great times we've had together.'

'I feel like the essence of connection has been lost in social media, so the fact that this app tries to combat this is really nice. I think it's really important to find meaning in the tasks so that people stay emotionally connected to home.'

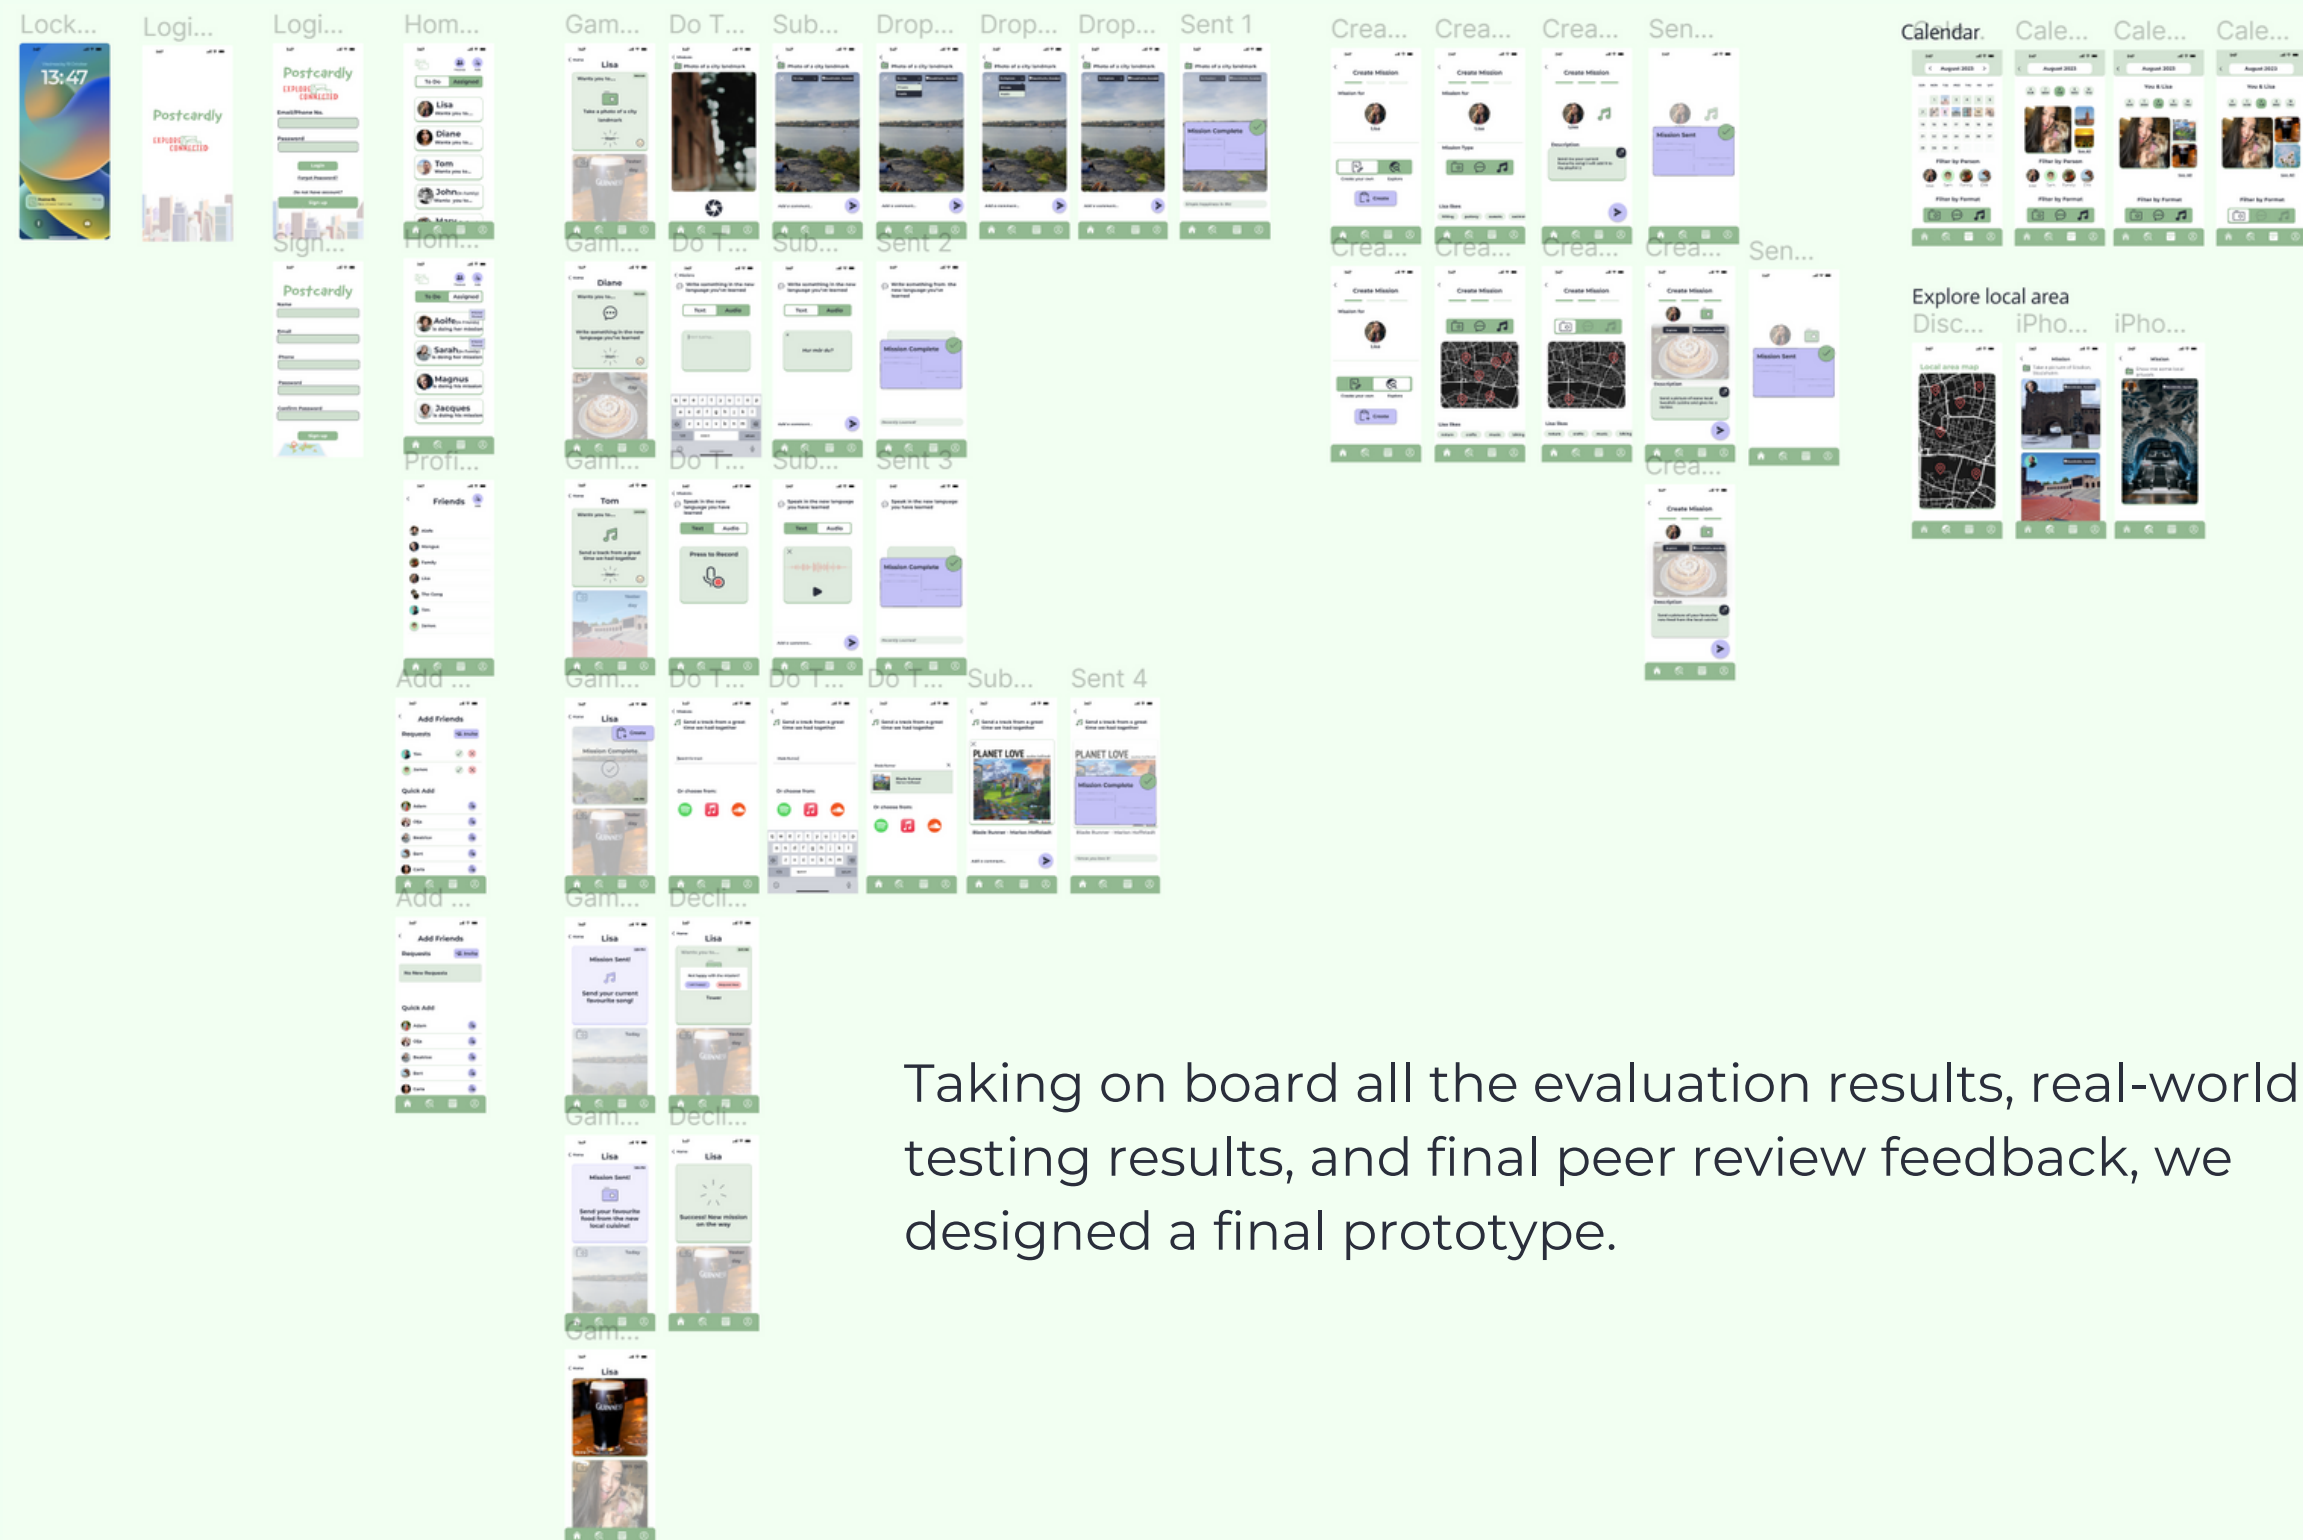

Discover

Define

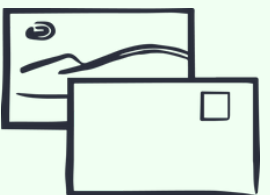

Develop

Deliver

Final Concept

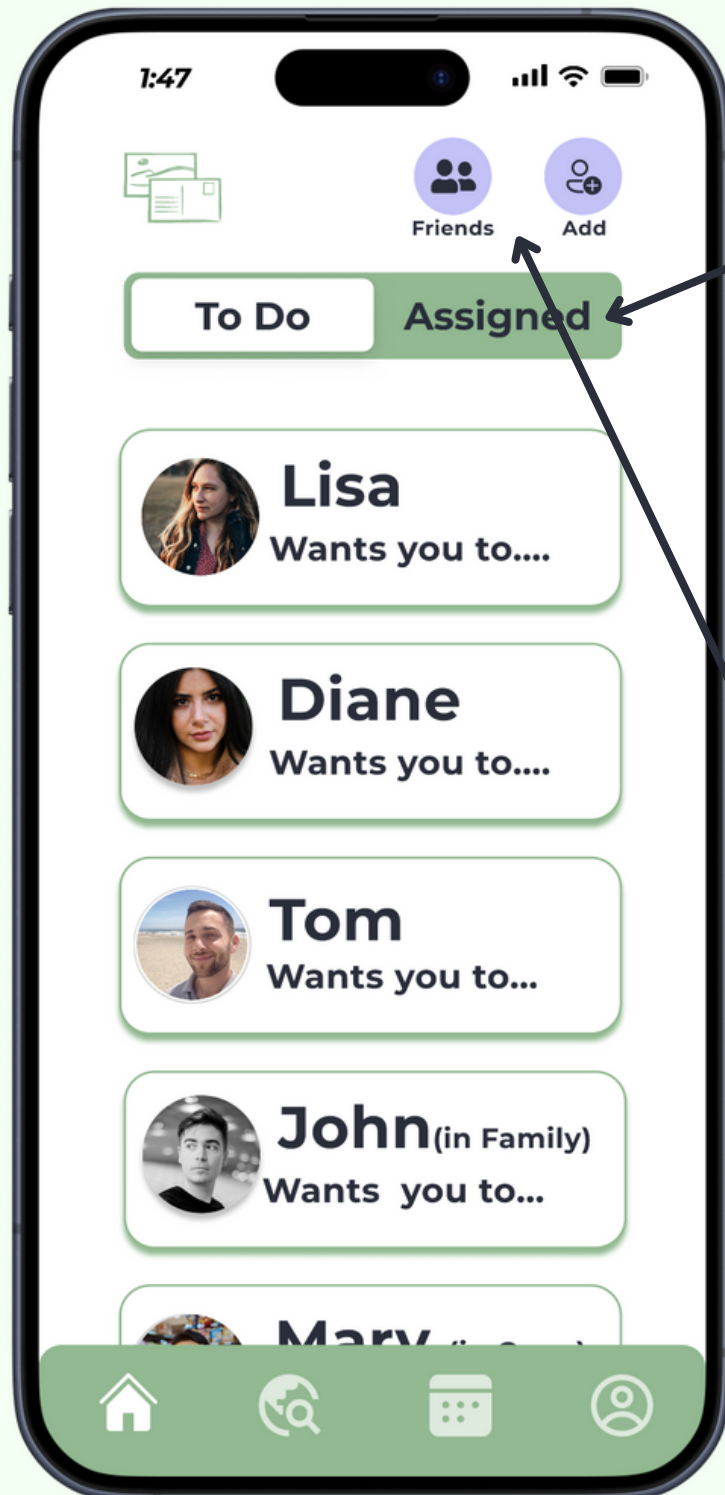

Taking on board all the evaluation results, real-world testing results, and final peer review feedback, we designed a final prototype.

Final Concept

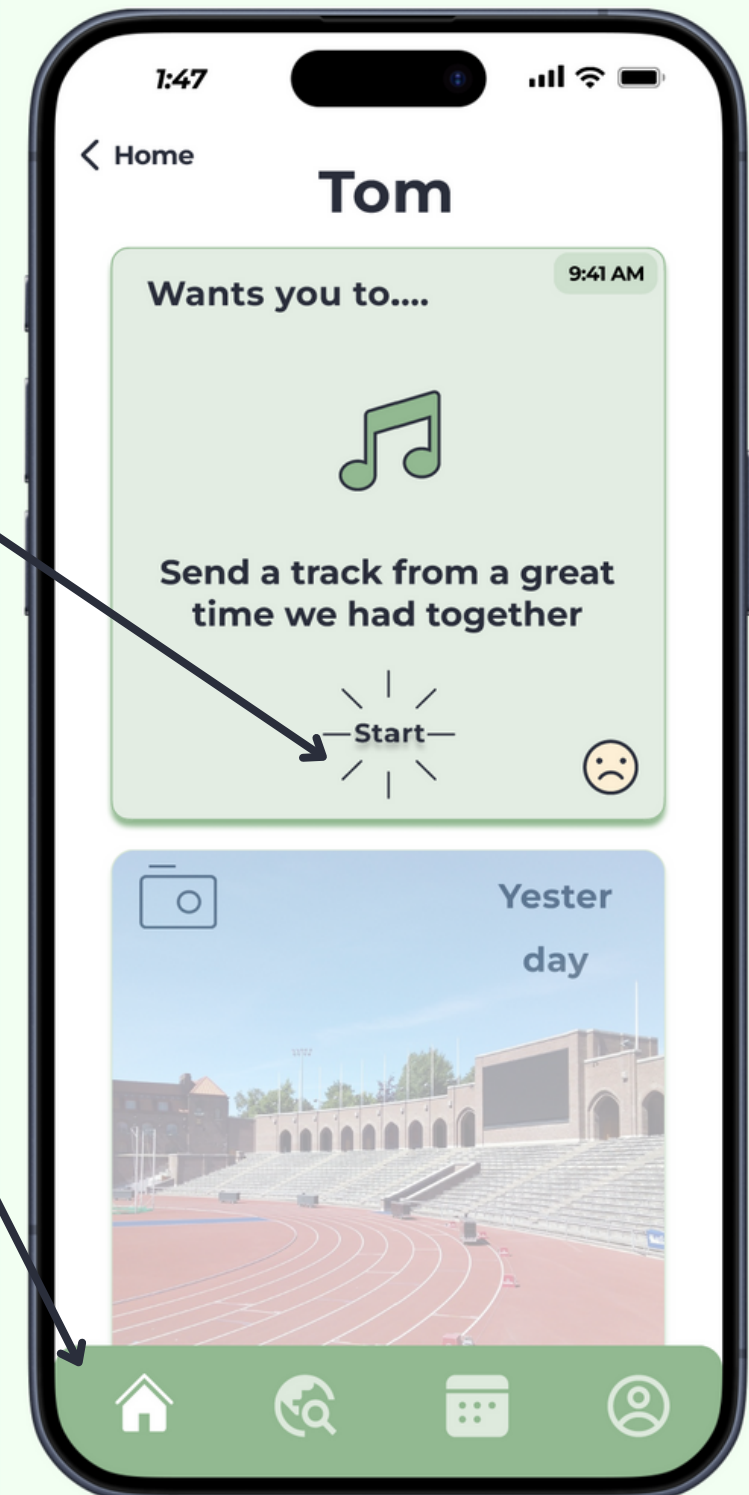

Home page tidied up and divided into easy to navigate to sections

Clearer to see how to begin a task and now the option to reject and look for a new task is included

Navigation buttons are made contrasting colour to stand out and are easy to find

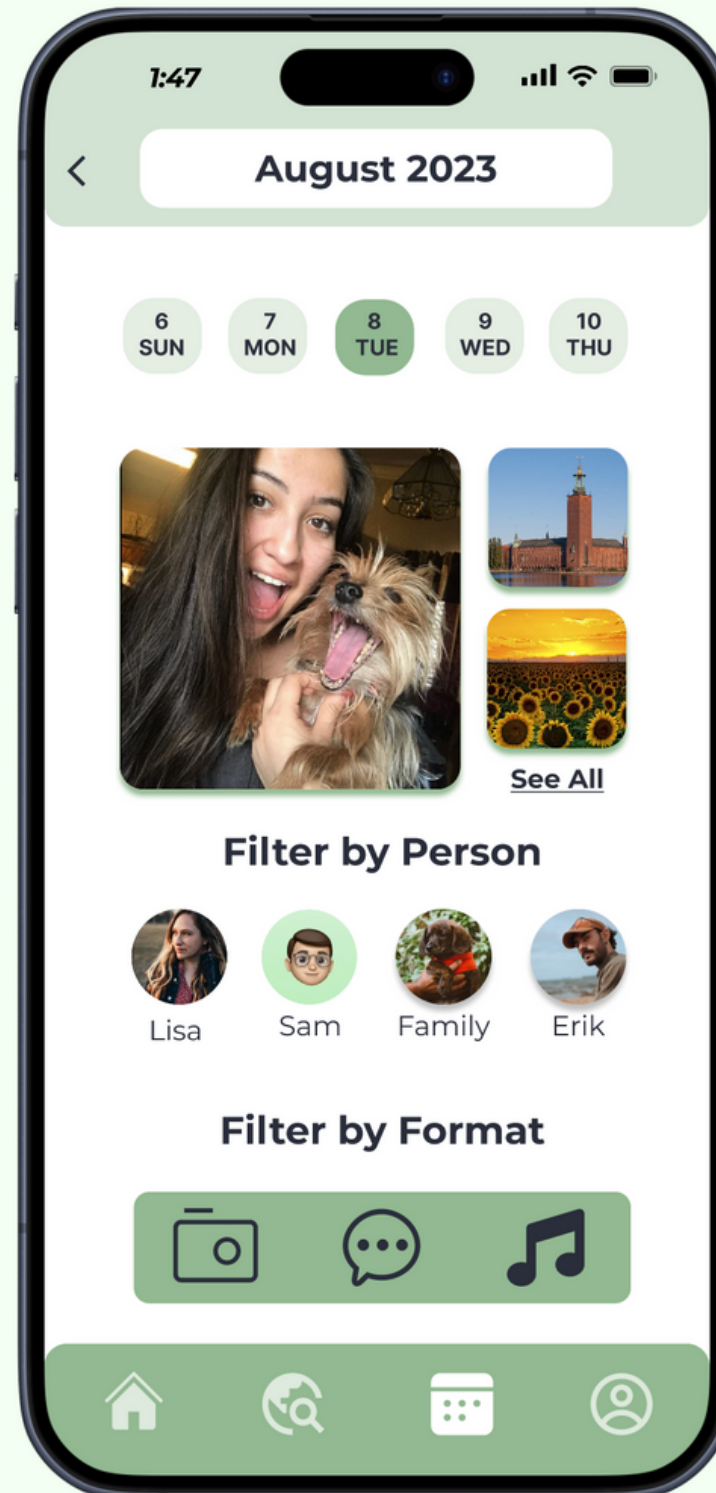

Green colour decided on to give a theme of exploration and outdoors

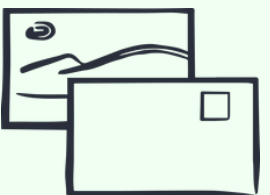

Final Concept

Through sending each other different missions, it adds more meaning to the social media concept of posting pictures, while also nudging the user to get out and explore their new home.

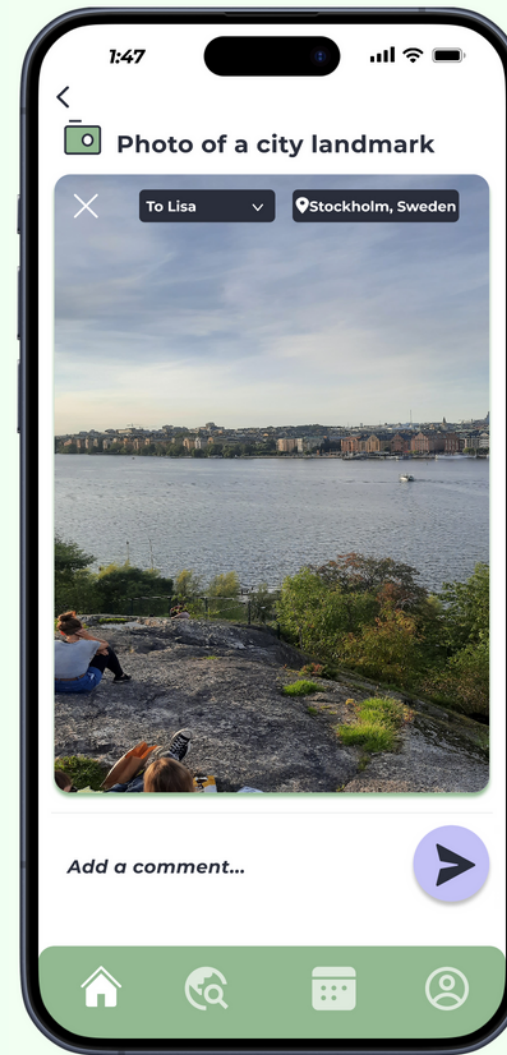

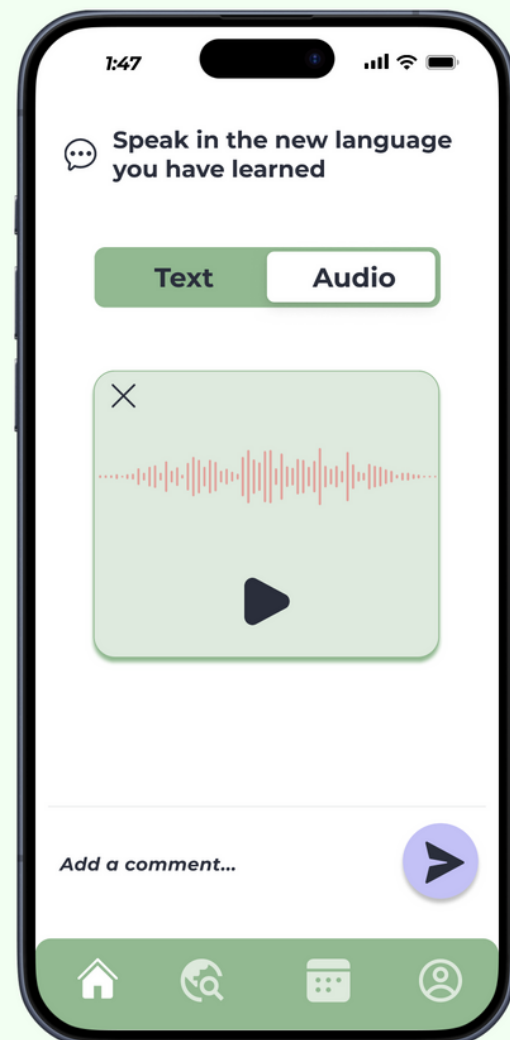

The goal of our concept is to provide a platform to people who move country by themselves, to keep that meaningful connection with their friends and family at home.

Users can set tasks, receive task, look back on memories (in picture) and explore tasks that people have completed in their local area. Through very simple functions we feel that we have designed an app that hits all our design goals.

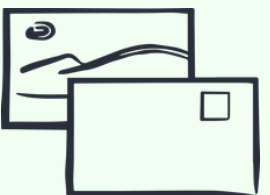

Final Concept

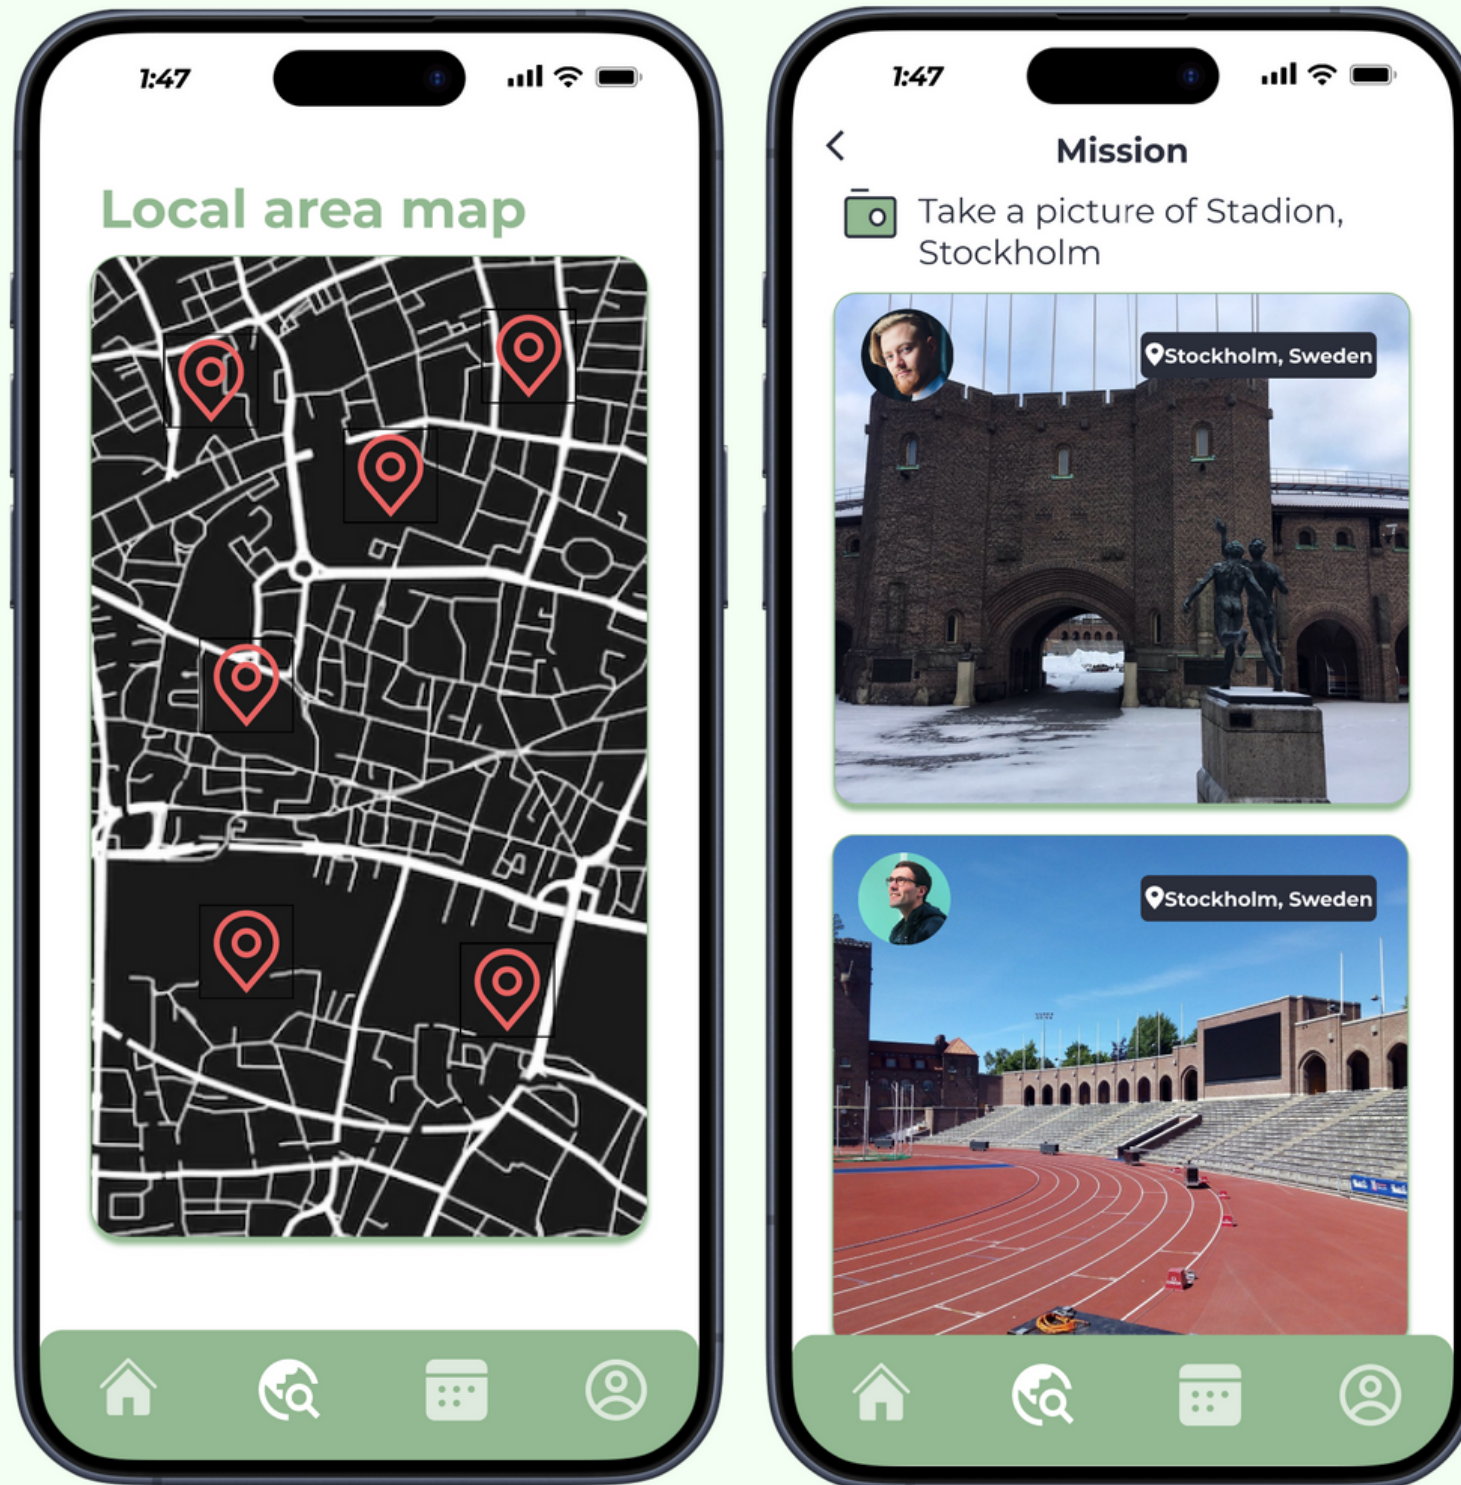

Tasks can be either a picture, a message/voice note, or a music track. Users can create their own task or use the explore function to set and edit tasks people have completed before.

There is no time limit as to when the tasks need to be completed but users will get notifications as reminders to complete the task. Users can also reject and ask for a new task from their friends.

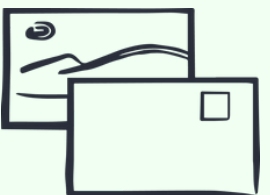

Final Concept

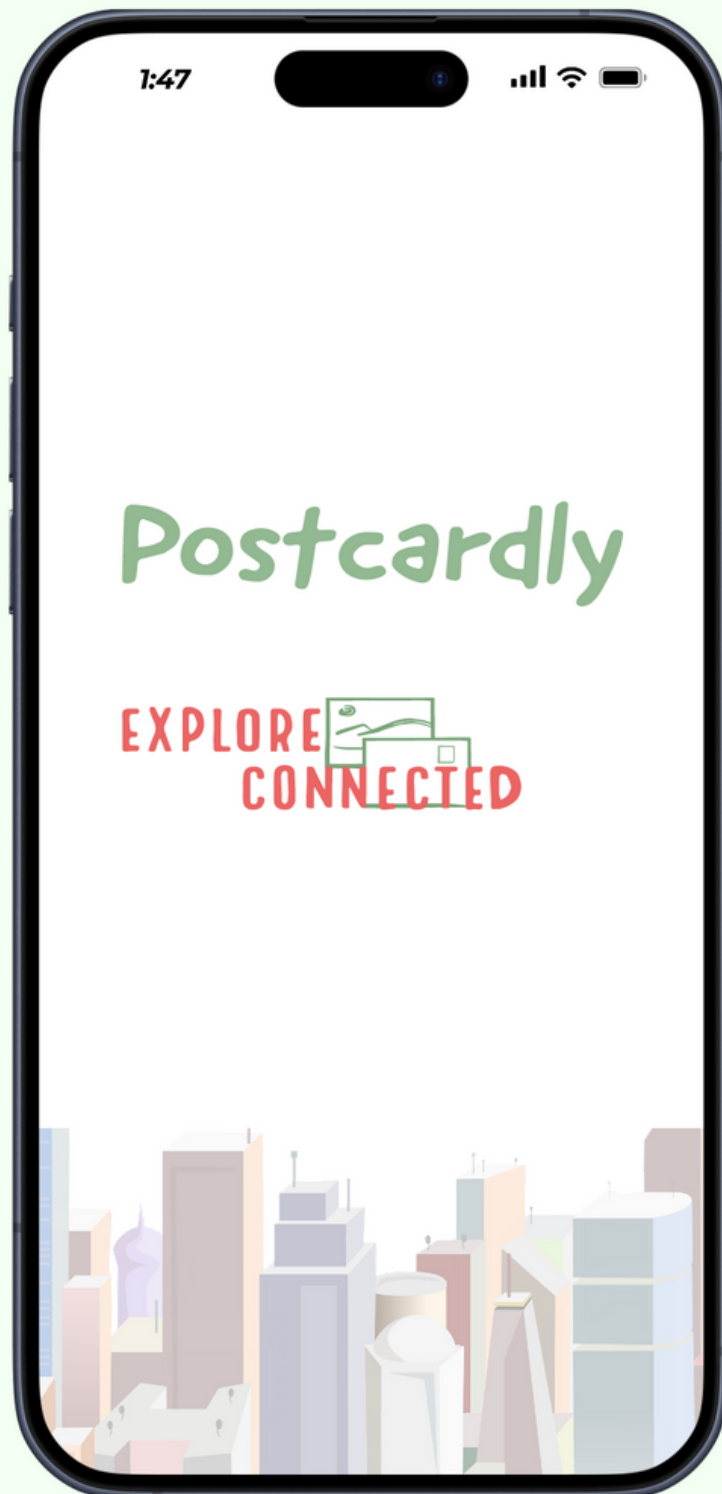

Through the explore feature, users can discover tasks that other users have completed in their local area. According to our real user tests, this feature was enticing to our participants as they like the idea of the app acting as a 'tour guide'

The explore feature can also be found when creating a task and can be used to inspire the user creating the task.

Final Concept

After testing our concept on real-world users and hearing their feedback, we are confident saying that Postcardly is a **successful solution** to the Problem Statement in its novel, game-like features which have a deep and meaningful effect on the integration process.

There is certainly a lot of potential for Postcardly to be developed further. With more time, the sky is the limit for this seemingly simple app.

Check out the app here: <https://bit.ly/3QtxPdh>
